Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 20-37, draw to a method of fabricating a semiconductor memory element arrangement, classified in class 438, and subclass 257.

Group II: Claim 38, draw to a semiconductor memory element arrangement, classified 257, and subclass 296.

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention. For example, in claim 28, wherein the first, second, third, fourth electrically insulating layers are formed from silicon nitride or silicon oxide; claims 36, 37, reading, writing, or erasing data of the semiconductor memory element arrangement by applying an electrical voltage to the second gate electrode with the first gate electrode free of voltage.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application.

Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
